

Earth's Own Activator Product Data Sheet

Earth's Own Activator

Turn waste into profit by making Greenbelt Bio-fertiliser using Earth's Own Activator

Product Information

Earth's Own Activator is a revolutionary product used to facilitate the accelerated decomposition of plant, animal and other bio-degradable materials.

Using our technology, waste is transformed into an odourless, environmentally friendly organic bio-fertiliser in approximately 30 days.

It contains 25+ types of beneficial microbes (18 bacteria and 7 fungi) that perform the following tasks:

- Rapid decomposition of biomass
- Nitrogen fixation
- Enzyme production
- Nutrient transformation
- Decomposition of polysaccharides
- Probiotics production

What Types of Waste can be used?

Any organic matter:

- Animal Manure
- Vegetation
- Paper and cardboard
- Food waste
- Deceased animals
- Fruit and vegetable waste

Who Can Use It?

- Composters
- Mulchers
- Piggeries
- Poultry farms
- Stables
- Farmers
- Canneries
- Food processing plants
- Abattoirs
- Local governments
 - Waste water and sewerage
 - Transfer stations
 - Vegetation management

Continuing Support and Assistance

Our team will supply the expertise and technical support to ensure you are successful in producing Greenbelt Bio-fertiliser using Earth's Own Activator. We assist our producers by providing:

- Feasibility studies
- Financial projections
- Ongoing consultation

To learn more about transforming your waste from an outgoing cost on your bottom line, to an income producing Bio-fertiliser contact us.
